PROFESSIONAL EXPERIENCE

Nexistry Digital Solutions   **August 2024 - Present**
- Contributed as a developer and systems architect for Nexiflow, a time-tracking system with project management features.
- Supported the onboarding and training of new team members, particularly in automation and backend tasks.
- Gradually took on additional responsibilities and later served as a lead developer.

Internship, Armada Logics Inc.   **January 2025 - March 2025**
- Contributed as a frontend developer, working alongside senior developers and ensuring tasks were completed on time.

EDUCATION

Tertiary Education
- Don Mariano Marcos Memorial State University
- Bachelor of Science in Information Systems
- Thesis on "NLUCycle: Next Level Urban Commuting".   **August 2021 - May 2025**

PROJECTS

- **NLUCycle: Next Level Urban Commuting:** Developed a mobile application where passengers can book tricycle wherever they are. The mobile application is developed using Android Studio as the IDE, Dart as the language, Flutter as the Framework, and Firebase as the database.
- **CGS Student Portal:** Developed a system where students of the College of Graduate Studies, DMMMSU-NLUC can view their assessment, subjects, and etc...
- **Nexiflow:** Developed a time tracking system with project management features
- **Instagram/Whatsapp Chatbot:** Connected different platforms (ManyChat, WATI, GymMaster, OpenAI, and Google Sheets) using Make to create a chatbot that responds to customer needs for the company.
- **GoHighLevel Automations with Third-Party Integrations:** Designed and implemented GoHighLevel automations integrated with third-party tools to streamline workflows, improve lead management, and support business operations.
